

JESSE MILLER

Greater Vancouver Area | Junior Full-Stack Developer | [Email](#) | [GitHub](#) | [LinkedIn](#)

SUMMARY

Junior full-stack developer with hands-on experience building responsive, database-driven web applications using React, Node.js, Express, Ruby on Rails, and PostgreSQL. Lighthouse Labs full-stack graduate with strong problem-solving skills, clean coding habits, and a focus on building intuitive user experiences. Brings proven leadership, calm decision-making, and reliability from several years as a BC Wildfire Crew Supervisor.

PROJECTS

KTSpeedrun - Kill Team Companion App ([CODE](#))

React, Vite, React Router, Express, WebSocket, CSS

- Built a multi-screen Kill Team flow (army, loadouts, strategy, turn transitions)
- Added a real-time lobby with join codes and WebSocket sync
- Shipped an attack workflow with dice tracking and damage previews

Across The Creek Organics - Seed Potato Catalog & Order Request ([LIVE](#))

React, Vite, React Router, SendGrid, CSS

- Built a responsive catalog with product pages, galleries, and structured data
- Implemented a cart-style request flow with quantities and confirmations
- Created secure serverless contact/order endpoints with validation

Web Dev Resume - Interactive Resume & Portfolio ([CODE](#))

React, Vite, CSS, Vitest, Mocha, Chai

- Built an interactive resume with standard/cyber themes, tabbed views, and animated UI
- Structured reusable sections with stateful interactions and micro-interactions
- Added unit + component tests to keep the UI stable as content evolves

EXPERIENCE

BC Wildfire Service | Crew Supervisor

May 2023 - March 2025

- Supervised five Initial Attack crews across two bases, ensuring safety, readiness, and performance
- Designed and implemented a custom crew-tracking system to optimize deployment and resource allocation
- Mentored and trained new leaders through structured coaching programs to enhance team performance and cohesion
- Coordinated emergency logistics and personnel movements during high-pressure wildfire incidents

BC Wildfire Service | Crew Leader / Member

2018 - 2023

- Led and supported wildfire suppression operations in rapidly changing environments
- Promoted to informal leadership roles, managing on-the-ground coordination and communication
- Facilitated clear communication between crews, command centers, and the public during interface emergencies

EDUCATION

Lighthouse Labs

Full-Stack Web Development Bootcamp | March 2024

- Completed intensive 12-week program covering full-stack JavaScript and Ruby on Rails
- Built multiple production-ready web applications using React, Node.js, Express, and PostgreSQL

Simon Fraser University

BASc, Engineering Science (Incomplete) | 2015 - 2017

- Completed coursework in physics, calculus, systems design, and programming

TECHNICAL SKILLS

Languages

JavaScript, Ruby, HTML, SCSS, CSS, SQL

Frameworks

React, Express, Rails, Bootstrap

Platforms

Node.js

Libraries

EJS, React Router

Databases

PostgreSQL

Testing

Mocha, Chai, Cypress, Vitest, Playwright

Tools

Vite, Git, GitHub, Command Line, Responsive Design, Form Validation, UI/UX

APIs

REST APIs, WebSockets, SendGrid

SOFT SKILLS

Strategic Thinking, Problem Solving, Accountability, Communication, Reliability, Leadership, Mentorship

HOBBIES

Board Games, Basketball, Cooking, Snowboarding, Hiking, Biking, 3D Printing, Reading
